

### Activity 8.1

Use the following sender and receiver values to check that the system described in [Table 8.1](#) works:

**a** sender uses the value  $x = 3$  and receiver uses the value  $y = 5$

**b** sender uses the value  $x = 7$  and receiver uses the value  $y = 6$

### Activity 8.3

A software company offers a suite of shareware programs (containing a spreadsheet, word processor, database and drawing package).

What are the benefits to:

- the company
- the customer

of offering software packages as shareware?
